

Rahat Qadeer

Software Engineer

LinkedIn: <https://www.linkedin.com/in/rahat-qadeer/> | Email: rahatqadeerbhatti@gmail.com

PROFESSIONAL SUMMARY

Software Engineer specializing in Full-Stack Web Development, with hands-on experience in building scalable web applications using JavaScript-based technologies, RESTful APIs, and both relational and non-relational databases. Strong focus on clean architecture, performance, and delivering user-centric, business-ready solutions.

TECHNICAL SKILLS

- **Frontend:** HTML5, CSS3, Tailwind CSS, React.js
- **Backend:** Node.js, Express.js (REST API Development)
- **Mobile:** React Native
- **Databases:** PostgreSQL, MongoDB, MySQL
- **Languages:** JavaScript, Python, Java, C++
- **DevOps:** CI/CD (Foundational Knowledge)
- **Version Control:** Git, GitHub
- **Design Tools:** Figma, Adobe Photoshop
- **Project Management:** ClickUp

PROJECTS

Riphah Rozee Pro (AI-Powered Recruitment Platform)

2025 - 2026

Tech Stack: PERN Stack, Google Gemini API

- Designed and developed an AI-driven recruitment platform for university-level hiring with semantic ATS screening.
- Implemented resume parsing and structured data extraction using Google Gemini API to enable intelligent candidate evaluation.
- Built recruiter dashboards with candidate categorization, multi-level screening, and skill gap analysis for fair and transparent shortlisting.

E-Commerce Web Application

2025 - 2025

Tech Stack: MERN Stack

- Developed a full-stack e-commerce platform with authentication, product browsing, cart management, and secure checkout.
- Implemented an admin dashboard for managing products, orders, and users with role-based access.
- Optimized UI for responsiveness and performance across desktop and mobile devices.

Inventory Management Mobile App

2023 - 2024

Tech Stack: React Native

- Built a cross-platform mobile application for real-time inventory tracking and stock updates.
- Implemented clean navigation and reporting features to reduce inventory errors and improve operational efficiency.

Smart Home Automation (UI/UX Design)

2023 - 2023

Tools: Figma

- Designed intuitive mobile UI/UX flows for controlling smart home devices such as lights, fans, and appliances.
- Created high-fidelity wireframes and prototypes focused on usability, simplicity, and modern design principles.

EDUCATION

BS Software Engineering

2022 - 2026

- Riphah International University Gulberg Green Campus, Islamabad.

CERTIFICATE

BS Software Engineering

- Create High-Fidelity Design and Prototypes in Figma. (Coursera)
- NOSQL System. (Coursera)
